Hi all - if you didn't get this already, this is worth looking at. As we discussed in Bergen, however, we would prefer to keep the addition of new references to a minimum EXCEPT where

- 1) really needed to update our assessment as it stands
- 2) the addition doesn't mean a widening of our assessment - we don't want to add any new issues that haven't been reviewed

Please try extra hard not to include any of your own new publications unless REALLY needed, and if you add references, see if you can DELETE some already being cited in our chapter. Remember that we still have to reduce our chapter size by a significant 5 pages.

Thanks, [REDACTED]

>Dear Colleague,

>Following the Government and Expert review of the Working Group I contribution to the IPCC Fourth Assessment Report, the attached guidelines are being provided to clarify how recent scientific literature related to review comments may be included in the final draft. Please feel free to distribute this information among your colleagues.

>Thank you for your interest in the work of the IPCC.

>Best regards,

Guidelines for inclusion of recent scientific literature in the Working Group I Fourth Assessment Report.

We are very grateful to the many reviewers of the second draft of the Working Group I contribution to the IPCC Fourth Assessment Report for suggestions received on issues of balance and citation of additional scientific literature. To ensure clarity and transparency in determining how such material might be included in the final Working Group I report, the following guidelines will be used by Lead Authors in considering such suggestions.

In preparing the final draft of the IPCC Working Group I report, Lead Authors may include scientific papers published in 2006 where, in their judgment, doing so would advance the goal of achieving a balance of scientific views in addressing reviewer comments. However, new issues beyond those covered in the second order draft will not be introduced at this stage in the preparation of the report.

Reviewers are invited to submit copies of additional papers that are either in-press or published in 2006, along with the chapter and section number¹ to which this material could pertain, via email to ipcc-wg1@al.noaa.gov, not later than July 24, 2006. In the case of in-press papers a copy of the final acceptance letter from the journal is requested for our records. All submissions must be received by the TSU not later than July 24, 2006 and incomplete submissions can not be accepted.

¹ see report outline at http://ipcc-wg1.ucar.edu/wg1/docs/wg1_outline.pdf
